

New trends, room for  
"warm" ideas

Modern shapes and forms, plenty of space with flexible, functional solutions: the home is evolving. Aristons keen eye for new stylistic trends and changes in life styles is looking for new ideas to meet emerging needs. Like this built-in coffee center providing at a touch many wonderful warm sensations from a traditional espresso to a frothy cappuccino, you decide.  
**Increasing your design options; by creating additional space with new functionality and taste.**

Coffee has conquered  
new spaces

Coffee Centers

 **ARISTON**

ed. 02/06

 **ARISTON**

## At your finger tips!

A highly ergonomic design. Nothing could be more stylish or more practical than the menu buttons integrated right in the control panel. Let the coffee center prompt your every command with a light touch to the menu keypad as you create your coffee sensation.

# 1

## Easy access right in front of your eyes.

# 4

Ease of use also means easy access. Access to the coffee beans, water container as well as areas requiring periodic cleaning. Just press the control panel and it slowly drops open allowing you to make your necessary adjustments.

Providing you to use a wide array of cup sizes, from small espresso cups to travel mugs up to a height of 6"

## Making the most of space.

Whether you want to integrate the coffee center into your kitchen or into another spot in the home your counter space will not be sacrificed. It's shallow depth and sleek styling integrates into any cabinet design.

# 2

## Not your ordinary coffee maker.

Thanks to the 2 heating element systems you can create a latte or cappuccino simultaneously as the coffee is being brewed. This convenience attends to even the largest dinner party. Or make a hot tea as you brew that perfect espresso.

# 5

## Open to new possibilities

# 6

Coffee at a touch, new design options or just dare to be different. In any case, the coffee center provides unlimited choices for you, your friends and your home.

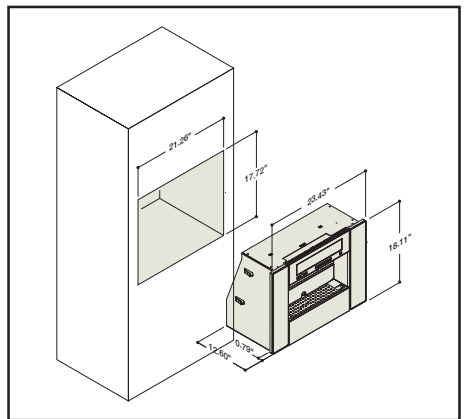

## Light or Strong.

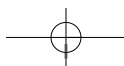

The advantage of customized brewing to the cup makes it possible for you to preset the coffee strength to your preference. Easily increase or decrease to the liking of your family and guests with a turn of the dial.

**Crease Care**

In each drying program the special final Crease Care option, periodically tumbles the clothes until you come back eliminating any chance of wrinkles. Post Crease Care can be combined with the delay dry option, eliminating any wrinkling of clothes prior to the start of the cycle.

**Air Fluff**

Air Fluff option is a 10 minute cycle for you dryer that helps refresh the clothes that have been in your closet for a long time: eliminating any bad smells.

**Less time spent ironing, more free time**

Ariston's new washing machines special **Easy Iron** option provides the ability to eliminate wrinkling caused when clothes are left in the drum. Just press the easy iron option button and the clothes will be held in water until you press the Easy Iron button again. This means no wrinkles. Now it will not only be a pleasure to do your laundry but ironing will be quicker and easier.

**As soft as silk**

Thanks to the Silk program, machine washing a silk garment as if it were a cotton item will become a completely normal action.

**No more pain, no more stains**

Even the most stubborn stains disappear without any pre-wash thanks to the special **Bleach** compartment which integrates the selected program increasing the additive's cleaning power. And above all there is no need to pre-wash by hand when combined with the **Soaking Option**.

**You choose when to wash**

The **Delay Timer** lets you program the wash start time for any time of the day even if you are not at home, up to 24 hours in advance. This includes the dryers which gives you a delay time of up to 12 hours. Now you can really react to your schedule.

**Detergent free too**

You will not find any trace of detergent which may ruin your garments or irritate sensitive skin. The special **Extra Rinse** option lets you add a further rinse level to the selected program in order to get rid of all traces of detergent.

**Your daily wash**

If you want fresh, clean laundry every day, the **Daily Wash** program lets you freshen up garments of different fabrics in no time at all - 30 minutes for a 7.5 pounds load washing in temperatures up to 120°F. Need it in a pinch?

**Detergent loss prevention**

100% detergent cleaning power is captured thanks to the pressure system which keeps the active soap in the washer and not down the drain. So it's nice to know your washing machine is not wasting a drop of detergent providing the maximum in cleaning efficiency.

**170° Sanitary Cycle**

Cleaning without additives is a nice option you can choose with Ariston. Its internal heating element boost the water temperature for sanitizing results.

**Controlled results**

Your washing machine is constantly monitored in order to ensure best washing results thanks to the **Sensor System** - a series of control systems. Your dryer is equipped with moisture sensor constantly monitoring the dryness level and your desire. Just set and forget and your clothes will come out at the dryness level you desire.

**Better than ever**

Improve the efficiency of your home with a washer that holds the lowest operating cost of any washer available; exceeding the requirements of **Energy Star** and still allowing you to handle big loads up to 15lbs.
